U. S. RECORD OF PERFORMANCE BREEDERS  
PARTICIPATING IN  
THE NATIONAL POULTRY IMPROVEMENT PLAN

The publication of this list is for the purpose of developing greater efficiency in the operation of the National Poultry Improvement Plan. Additional information regarding these breeders may be obtained by writing to them or to the ROP supervisors in their respective States. This list is revised annually.

Foreword

The breeders listed in this publication are participating in the U. S. Record of Performance breeding stage of the National Poultry Improvement Plan, according to reports submitted by the State ROP supervisors. The list of breeders on pages 3 to 13 also includes the number of candidates entered and the estimated number of females in single-male USROP matings. These data provide a basis for estimating the volume of USROP products that will be available on each of these farms. The official pullorum class of each flock is also shown. The classification of the USROP breeder's hatchery may be lower than that for his own flock; therefore, the pullorum classification of the hatchery should be ascertained before USROP chicks are purchased to be used in a participating flock.

Number of flocks, candidates, and females in U.S. Record of Performance matings by breeds, 1946-47 trap-nest record year
